A PLACE WHERE MOMENTS STAY

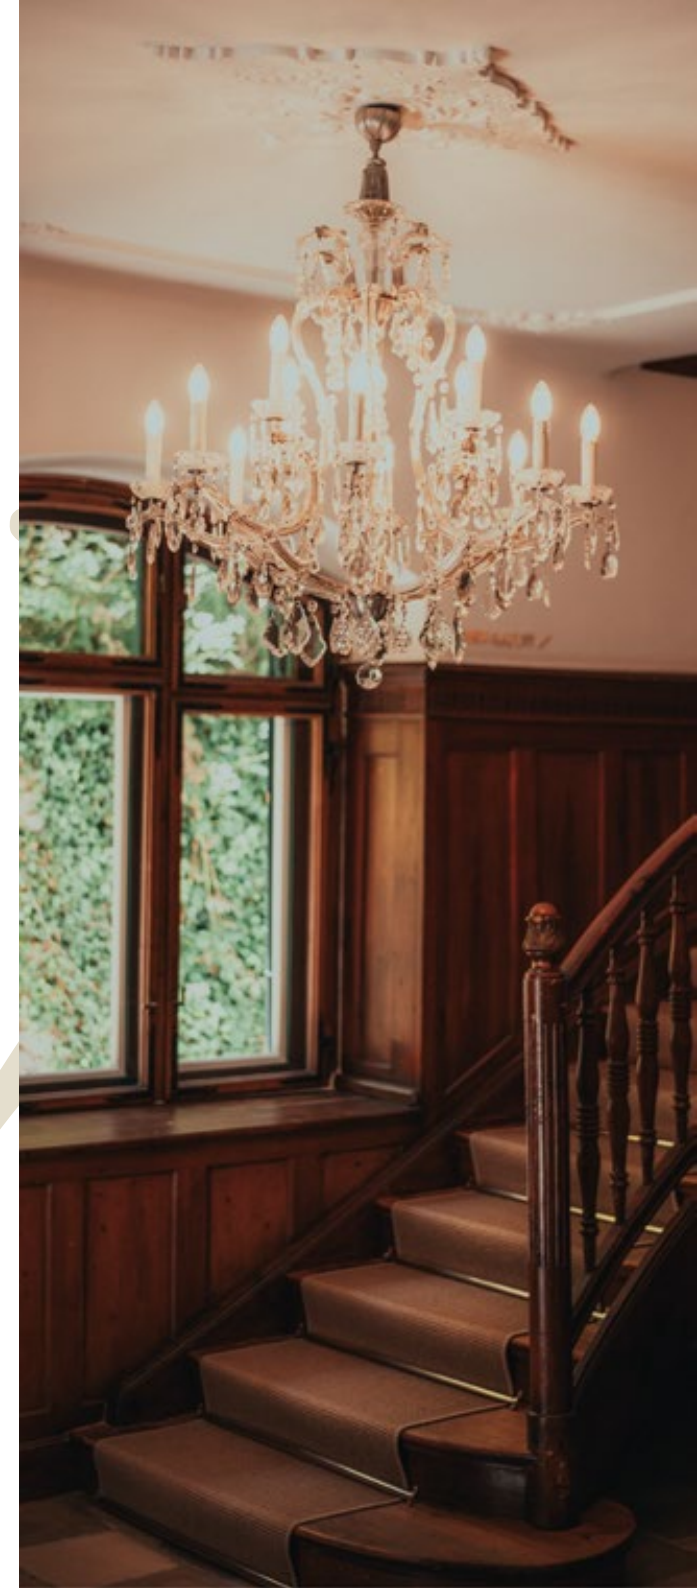

Nestled in the mountain landscape of Semmering, Villa Schönthaler is a place defined by history and a unique atmosphere.

The villa preserves its character from the turn of the century and blends quietly into its surroundings. This creates a setting that is deliberately understated, leaving space for what truly matters on this day.

Whether in an intimate setting or together with family and friends, the house is yours to enjoy exclusively and allows for a freely designed celebration.

Villa Schönthaler does not seek to be in the foreground. It provides the setting for a day that will be remembered.

Welcome to Villa Schönthaler.

CEREMONY

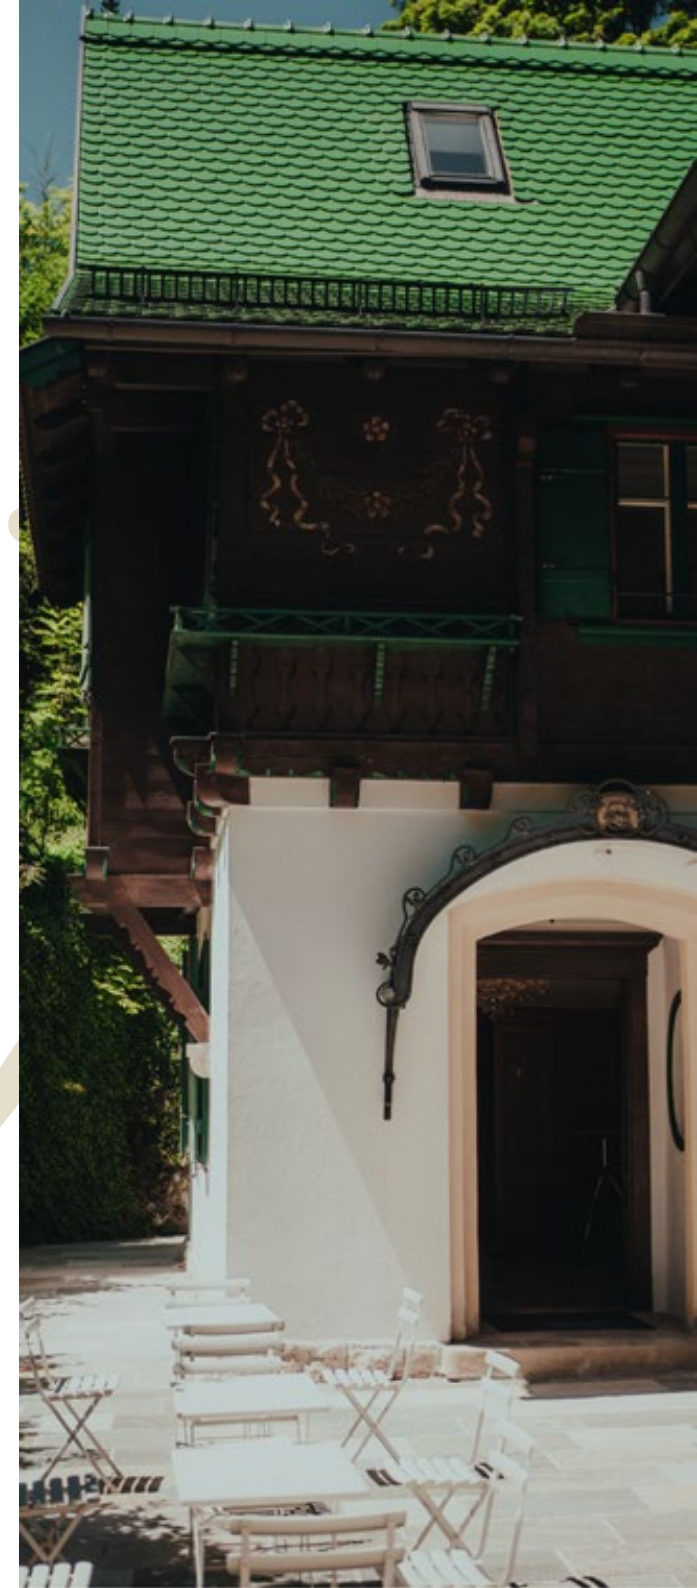

The ceremony is the moment everything comes into focus.

For a while, everything else falls away — the everyday, the surroundings, the quiet background of the day. Words begin to matter more, a glance can say everything, and the moment stands on its own.

It is one of those rare times when you are fully present.

Villa Schönthaler offers a calm and unobtrusive setting. Nothing feels forced, nothing feels excessive — just a place that gives space. The landscape of Semmering adds to the atmosphere and naturally draws attention to what truly matters.

What emerges is a moment that doesn't feel staged, but simply right. One that stays with you.

BETWEEN HISTORY AND NEW MOMENTS

A VILLA WITH A STORY

Villa Schönthaler was built in 1882 as the first villa of the Semmering ensemble. Named after the imperial court sculptor Franz Schönthaler — an enthusiastic alpinist and co-founder of the Semmering villa culture — it still reflects the origins of this unique architectural heritage today.

ARCHITECTURE WITH INTENT

Designed together with architect Franz von Neumann, the villa reflects the spirit of its time, shaped by an interest in alpine architecture. Influenced by the work of Ernst Georg Gladbach, the result is what became known as the Semmering style — a blend of traditional timber construction and representative design.

A VIEW INTO THE LANDSCAPE

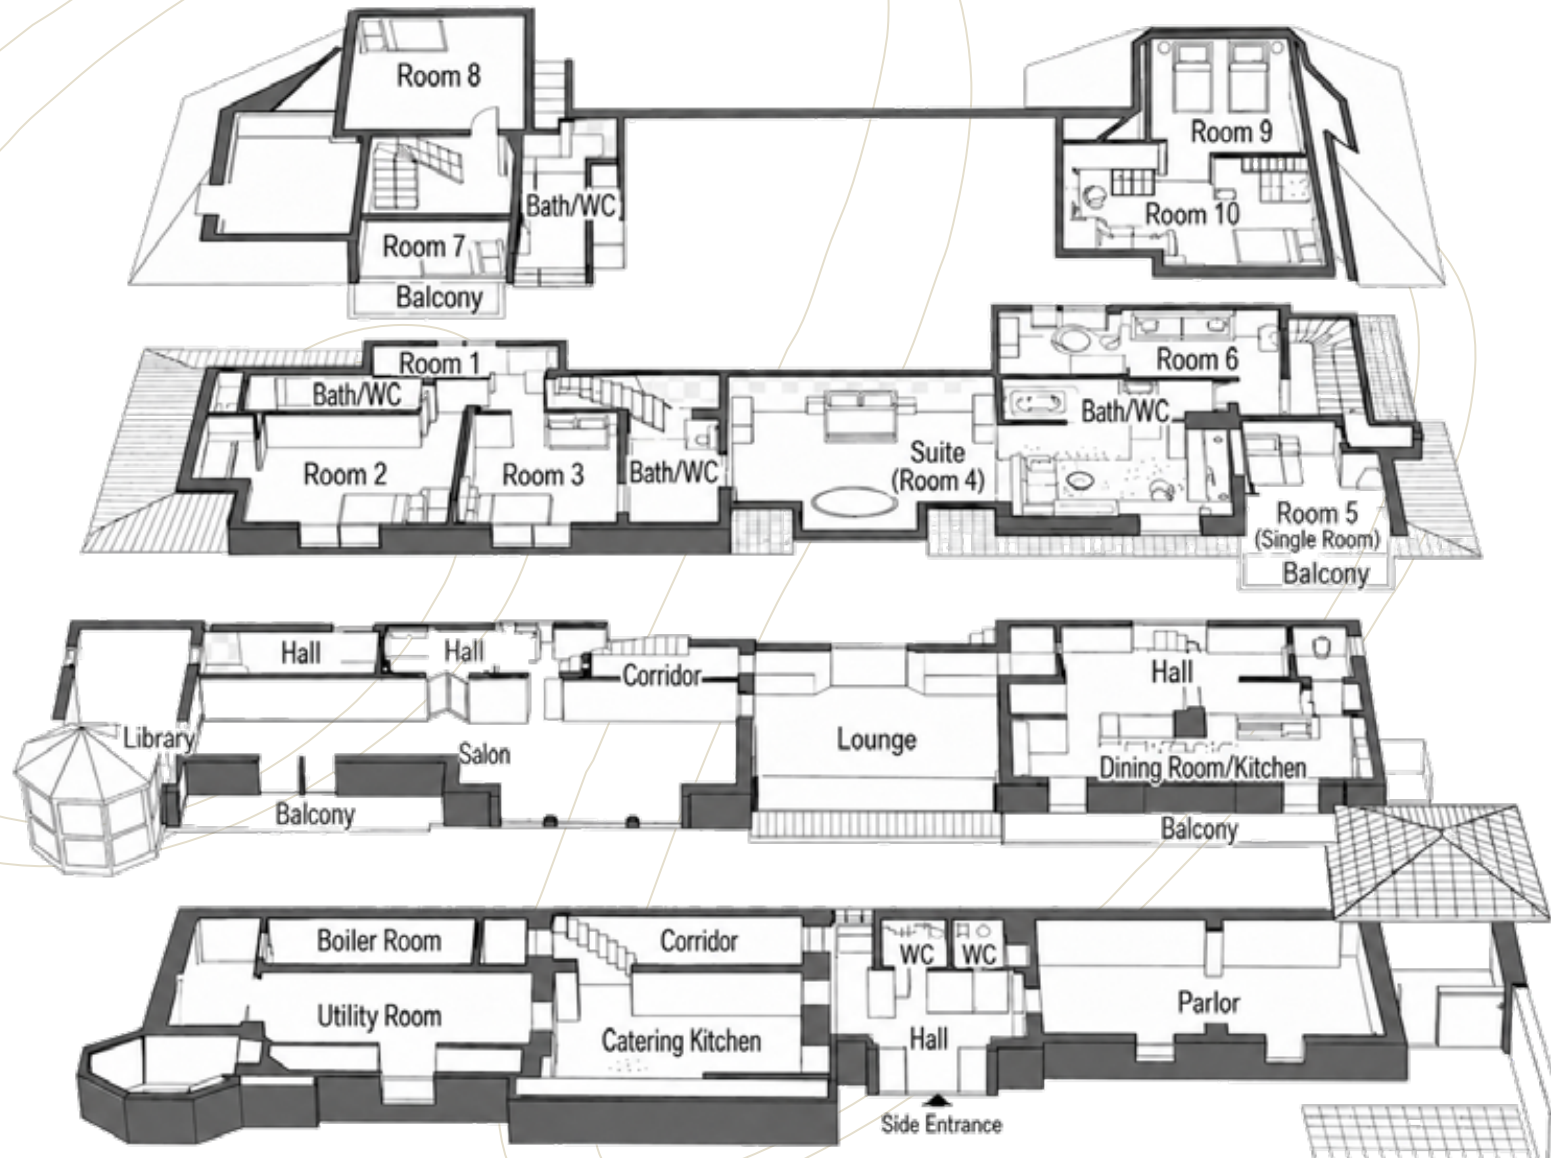

The villa is defined by its distinctive roof, its articulated façade, and its deliberate orientation. It opens towards the surrounding landscape, creating views that continue to shape the character of the place.

A RETREAT WITH MEANING

From the very beginning, the villa was more than just a building. It reflected a desire for calm, for nature, and for distance from everyday life.

Architecture and landscape were conceived as one — almost like a stage — creating a sense of harmony that still defines Villa Schönthaler today.
